RapidAir is a complete compressed air distribution system that is designed to easily install beneath walls of new construction, or on wall surfaces of existing workshops.

Air Anywhere

No more dragging the compressor behind you and untangling the air hose and electrical cords. Reduce shop clutter and have constant compressed air instantly, anywhere.

Economical

An alternative to black or copper pipe installations, the modular design makes it less expensive to install than the traditional methods. With the RapidAir system there is no interior pipe corrosion, which results in longer tool life.

Easy to Install

The RapidAir system includes professional quality Rapid Fittings, air distribution manifolds, air outlets, and nylon tubing. The system is engineered to maintain 150 psi.

Install it yourself...
you can easily disassemble
and re-modify your system.
There are no special tools
required to make your
workspace more efficient
and professional looking.

RapidAir Fittings

RapidAir fittings are designed to make installation fast and easy. Simply push the tubing firmly into the fitting until seated. If removal is desired, push in evenly on release button and pull tubing out of fitting.

1/2" Nylon Tubing 1/2" OD x 3/8" ID Tubing Sold in 100 ft. roll. **Working Pressure 150 PSI** Temperature Range: -40°F to +180°F Our nylon tubing is lightweight, corrosion/abrasion resistant and extremely durable. Compressor oils have no effect on it's performance.
