

ComPRESSED™

BY RAPIDAIR

INDUSTRIAL

**Press Type - All Metal Fitting
Compressed Air Piping System
Rigid Pipe and Flexible Tubing**

SIZES: ½" to 6"

Energy Efficient

- Smooth inner wall and free flowing fittings lower compressed air costs
- Sealed connections means your compressor run time is less

RAPID Installation

- Press fittings are fast to install
- O-ring system gives leak free system performance
- Material/construction for lifetime reliability
- Designed for ease and consistent installation
- May be applied to aluminum and stainless piping and semiflexible tubing

Rigid Pipe System

Fittings Specs 3/4" - 4"

- Press Style
- 304 Stainless Steel
- O-Ring: Nitrile

Fittings Specs 4" - 6"

- Lug Style
- Diecast Aluminum Alloy
- Seal: Nitrile
- Powder Coat

Rigid Pipe System Ratings

- 232 PSI Working Pressure
- -4°F to 176°F
- Compressed Air
- Inert Gas
- Vacuum 29 Hg
- Oils, lubricants
- Non-Potable Water
- UL94 HB Fire Resistant
- OSHA Compliant
- ASME B31.1, B31.9
- ASTM B241

Alum Pipe 3/4" - 6"

- Alloy grade 6063, 5052 T5
- Blue powder coat, RAL5012 outside
- Green powder coat, RAL6018 outside
- Non-chromate conversion coating inside

SS Pipe 3/4" - 2"

- 304 Grade
- Surface Finish OD 0.8μ
- Surface Finish ID 0.4μ

Superior Air Quality

- No corrosion system means longer tool life
- Cools hot compressed air quickly
- Free flow fittings allow maximum air flow capacity

Versatile Applications

- Suitable for all applications and environments
- Connect to any existing piping system
- Compressed air and inert gases

LIFETIME WARRANTY

Flex Tubing System

Fittings Specs 1/2" - 2"

- Press style
- Nickel Plated Brass Body
- Crimp Ring: Stainless Steel
- Double O-Ring: Nitrile

Flex Tubing System Ratings

- 232 PSI Working Pressure
- -40°F to 140°F
- Compressed Air
- Inert Gas
- Vacuum 29 Hg
- Non-Potable Water
- OSHA Compliant
- ASTM F1282
- ASTM F3347

Tubing 1/2" - 2"

- Multi-layer semi flexible tubing
- Inner and outer layer – HDPE
- Center layer – aluminum
- Sizes measured on inside diameter

Bend Radius

- 1/2" Tubing: 4-6 inches
- 3/4" Tubing: 8-10 inches
- 1" Tubing: 10-12 inches
- 2" Tubing: 36-48 inches

Will hold any bent shape.

Warnings

- Compressed air is DANGEROUS if not used properly
- Always use EYE PROTECTION when using compressed air 
- DO NOT POINT compressed air at your body or any person
- Pressurize system SLOWLY
- TURN OFF air compressor when not in use
- CHECK local building codes before installation

 **WARNING:** This product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

Wash hands after handling.

CONTAINS LEAD: MAY BE HARMFUL IF EATEN OR CHEWED.
MAY GENERATE DUST CONTAINING LEAD. KEEP OUT OF THE REACH OF CHILDREN.

Rigid Pipe is NOT:

- For underground burial
- To electrically ground equipment
- To be welded
- To take violent impacts
- To be used where the compressed air temperature is above 176° F
- For environments of caustic or corrosive chemicals

Flex Tubing is NOT:

- To be glued
- To take violent impacts
- To be used where the compressed air temperature is above 140° F
- For environments of caustic or corrosive chemicals
- When using in direct sunlight, cover or paint the plastic tubing to protect from UV exposure (Fittings need no covering and can be exposed)

Installation Tips & Recommendations

Care must be taken on any installation of the FastPipe system. Pipes will be carrying compressed air/gas up to 232 psi. The FastPipe system is only as safe as a thorough installation. Read all installation instructions and watch videos before starting. Below are some tips for a safe installation.

We strongly recommend that the installer contact our tech department for installation questions PRIOR to the installation.

- Assemble all NPT **PIPE THREADS** with two wraps of Thread tape and then pipe sealant which prevents thread galling.
- Support the pipe with clips/ hangers a maximum of **10 FT. SPACING** and on **ONE SIDE OF EACH FITTING**.
- FastPipe can be bent to a maximum of 15° **DO NOT OVER BEND**.
- Any machine/compressor plumbed to the FastPipe must have a **JUMPER HOSE** to reduce vibration.
- Any piping system will expand and contract with temperature changes. Use **EXPANSION JOINTS** to compensate for this movement of aluminum pipe in non-conditioned buildings.
- **DO NOT USE** FastPipe for **PULSING** desiccant dryers or other like equipment.
- **CAUTION** installing inert gas bulk tank systems, gas must be warmed up to FastPipe temperature range.
- Use a strain relief attached to the building for any rubber hose drops attached to the piping.
- **DO NOT** connect quick couplings for air hoses to reducing elbows or tee fittings. The constant connecting/ disconnecting and pulling or air hoses could loosen the fitting. Use the FastPipe **WALL OUTLET** which can be secured to a wall or post. Any hoses attached in the ceiling area to a fitting must use a strain relief attached to the building structure.
- **CHECK** that all fittings are tightened before pressurizing the system for the first time.
- For initial installation, pressurize system **SLOWLY** to 50 psi and check for leaks, then pressurize slowly to MAX 232 psi.
- **CUT** the tubing **STRAIGHT** with the supplied cutter; do not use a hacksaw.
- **CHAMFER** the end of the tubing with the supplied tool. When pushing the tubing into the fitting, the o-ring must insert smoothly. If the end of the tube is sharp, it will cut the o-ring and **CAUSE LEAKS**. Use a spray bottle with a couple of drops of dish soap and fill it with water for lubrication.
- **TUBING** must be **INSERTED** into the fitting fully to the shoulder inside.

**PRODUCTS MANUFACTURED BY THE SELLER CARRY A WARRANTY.
SEE WWW.RAPIDAIRPRODUCTS.COM FOR MORE DETAILS.**

Pipe

Wall or Ceiling Installation

- Use pipe clips to secure pipe to any flat surface with mounting screw
- Ceiling or wall mount
- Clip has 5/16" thru hole and hex bore for a 5/16" hex nut
- Hex nut serves as a backer for screws
- Use #10 Drywall Screw or Tapcon
- In horizontal installations, mount clip pivot tab up

MAIN SIZE	PART NUMBER	X DIMENSION

STEP 1

STEP 2

STEP 3

STEP 4

Saddle Drop Installation

- System must be de-pressurized before installing
- To prevent chips from entering the pipe interior, stop drilling occasionally and blow out chips, grease the end of the drilling tool

1. Position saddle drop opposite the side of the pipe that needs the hole
Tighten securely and mark the pipe by the raised locating mark on the fitting
Mark the pipe both horizontally & vertically along the fitting edge
2. Drill thru one side of the pipe with the drill bit, using the hole in the fitting as a locator
3. Insert the saddle drop gasket into the molded cavity
4. Position the saddle drop over the drilled hole with aligning marks, tighten securely
5. Attach the necessary drop pipe or threaded adapter
